

Sniper Trader

User Guide

Trading tools — how to use them

1. Open the panel

In the bot chat, send:

```
/menu
```

Use the buttons on screen, or type the commands in this guide.

2. Start or stop trading

Start trading	Bot may open new buys when a coin passes your rules.
Stop trading	No new buys. Open trades can still exit.

```
/starttrading  
/stoptrading
```

3. Chains

On the menu, turn **Solana** or **BSC** ON or OFF.

4. Platforms

Menu → Platforms

Tap each row to turn ON or OFF:

- pump.fun
- Raydium LaunchLab / LetsBonk

- Meteora / Believe
- Moonshot
- Boop.fun

ON = watch that platform. **OFF** = ignore it.

5. Capital (buy size)

Menu → Capital %

Solana % / BSC %	Share of balance used on each buy.
Max per trade	Hard ceiling in SOL or BNB, or no cap.

```
/setcapital 5
```

Example: 5 means about 5% of balance per trade.

6. When the bot sells

Menu → Take profit

Take profit %	Sell when profit hits this % (or Auto).
Stop loss %	Sell when loss hits this % (or Auto).
Max hold	Sell after this many minutes (or Auto).

```
/settp 20
```

```
/setsl 15
```

```
/setmaxhold 10
```

7. Risk tier

LOW only	Fewer, stricter entries.
LOW + MEDIUM	More coins allowed.

8. Filters

Menu → Filters

Max dev %	Skip high creator holdings.
------------------	-----------------------------

Max top-10 %	Skip concentrated holders.
Max risk score	Only enter at or below this score. Lower = pickier.

```
/setscore 40  
/setdev 30  
/settop10 70
```

9. Safety toggles

Menu → Safety toggles

Block mint authority	ON = reject mintable coins.
Block creator rugs	ON = reject flagged creators.
Min market cap	Minimum USD market cap. 0 = off.
Max single holder %	Reject one large holder. 0 = off.
Max high ownership %	Reject high concentration. 0 = off.

```
/setminmcap 10000  
/setminmcap 0
```

10. Daily limit

Max entries per day (UTC).

```
/setmax 5
```

11. Scanner · Positions · Wallet

```
/scanner – feed live? coins seen / passed / bought  
/positions – open trades  
/balance – wallet
```

12. Analyze a coin

Paste a contract address, or:

```
/analyze CONTRACT_ADDRESS
```

Shows how it fits your current rules.

13. Simple flow

1. Send **/menu**
2. Tap **Start trading**
3. Set **Capital %**
4. Set **TP / SL / max hold** (or Auto)
5. Choose **Risk tier**
6. Adjust **Filters** and **Safety** if needed
7. Turn on **Platforms** you want
8. Check **Scanner**
9. Follow **Positions**
10. **Stop trading** to pause new buys

Command list

/menu	Control panel
/status	Status summary
/scanner	Feed health
/positions	Open trades
/balance	Wallet
/analyze CA	Inspect a coin
/setcapital n	Capital %
/settp /setsl /setmaxhold	Exit rules
